

Before You Begin

Did you sign up for a Industries training playground already? You'll need one to do the steps in this guide. Here's how to request one if this is your first time doing the exercises:

1. Sign up for a Industries training playground.
 2. Fill out the form.
 - a. For Email, enter an active email address.
 - b. For Username, enter a username that looks like an email address and is unique, but it doesn't need to be a valid email account (for example, yourname@industriestraining.com).
 - c. After you fill out the form, click **Sign me up**. A confirmation message appears.
 3. When you receive the activation email (this might take about 30 minutes), open it and click **Verify Account**.
 4. Complete your registration by setting your password and security challenge question.
- Tip:** Write down your username, password, and login URL for easy access later.

You are logged in to your Industries training playground and you can begin practicing.

Exercise 3: Explore Client-Side Document Generation

Scenario

“As a Sales Rep, I’d like to generate contract documents with a click of a button from a quote record page and have a Word Document and PDF version attached in the Notes section of the quote record page.“

Customize the sample client-side OmniScript. Add a button to the quote record page that launches the OmniScript.

Prerequisites

- Create .DOCX Document Templates

Tasks

1. Review the sample Client-side OmniScript
2. Version and edit the sample client-side OmniScript
3. Edit the Generate Document button on the quote record page to launch the OmniScript

Time: 30 mins

NOTE:

There's a recent change to session settings that affects your experience using LWC OmniScript Designer. After you get your training playground, please make this quick change before beginning exercises.

1. Click Setup (the gear icon) and choose Setup.
2. In the Quick Find, search for and then go to Session Settings.
3. Deselect Use Lightning Web Security for Lightning web components.
4. Clear Chrome cache after changing the setting or do a hard refresh.
 - a. In Chrome, select the three dots on the top right.
 - b. Go to Settings > Security and Privacy > Clear Browsing Data.

For more information, see:

<https://help.salesforce.com/s/articleView?id=000393105&type=1>

Task 1: Investigate the Sample Client-Side OmniScript

1. Using the **Lightning App Launcher** , type `omniScript` in the search box. Click **OmniScripts**.
2. Click the expand icon next to `docGenerationSample/singleDocxLwc`.
3. Open the latest version. Click **Single Doc - DOCX (LWC)** to open the client-side sample OmniScript.

OMNISTUDIO OmniScripts					
As of - Viewing as Industries Admin					
Type	Language	Description	Last Modified ...	Last Modified	
docGenerationSample/singleDocxLwc	English	Demonstrates how a single document can be gene...	6/27/22 11:06 PM	Industries Adm	
Single Doc - DOCX (Version 8)	English	Demonstrates how a single document can be gene...	6/27/22 11:06 PM	Industries Adm	
Single Doc - DOCX (Version 7)	English	Demonstrates how a single document can be gene...	6/27/22 11:06 PM	Industries Adm	

Explore Client-Side Document Generation

Exercise Guide

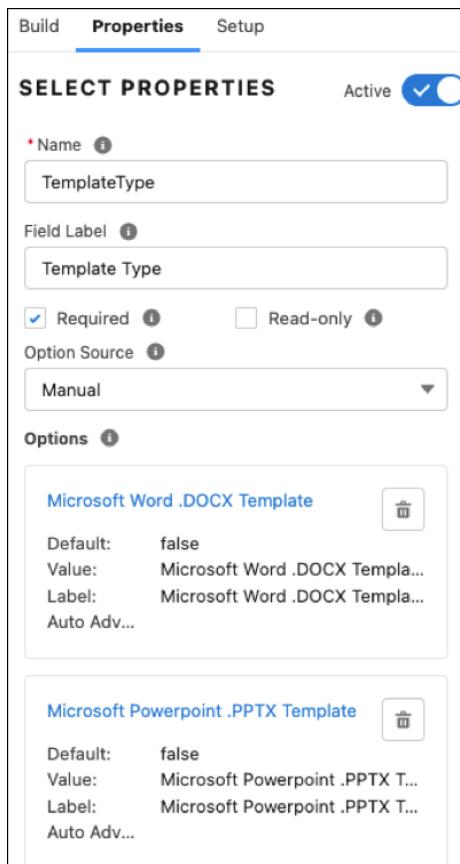

4. Click **Deactivate Version** to deactivate the OmniScript and then click **Done**.

The screenshot shows the 'OmniScript Single Doc - DOCX (LWC)' properties. The 'Deactivate Version' button is highlighted with an orange box. Other visible fields include Type: docGenerationSample, SubType: singleDocxLwc, Language: English, Version: 8, Active: true, and Description: Demonstrates how a single document can ...

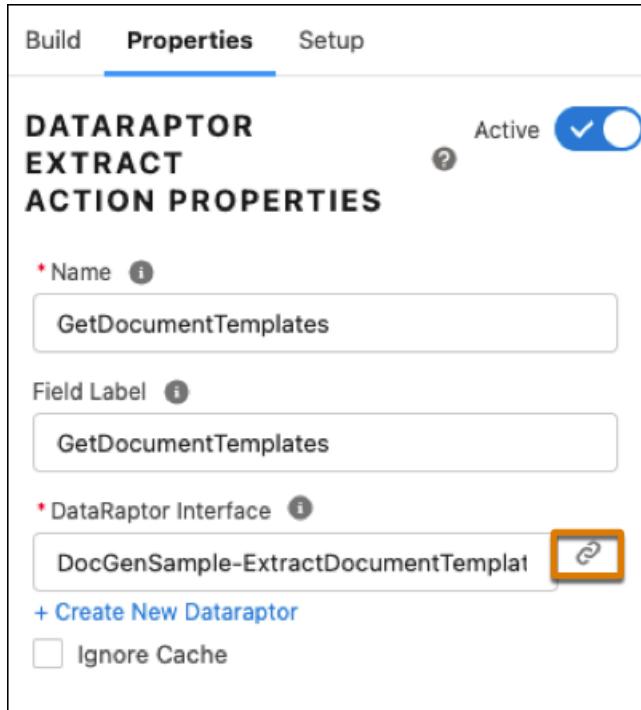

5. Click on **EnterObject** step element. Notice the fields.

The screenshot shows the 'EnterObject Step' configuration. It includes fields for 'Enter Object Id' (ObjectId) and 'Template Type'. Both fields are highlighted with an orange dashed box. A 'Next' button is at the bottom right.

6. Click the **Template Type** select field and notice the select options in the right panel under the **Properties** tab. The user has the option to select between Microsoft Word and Powerpoint templates.

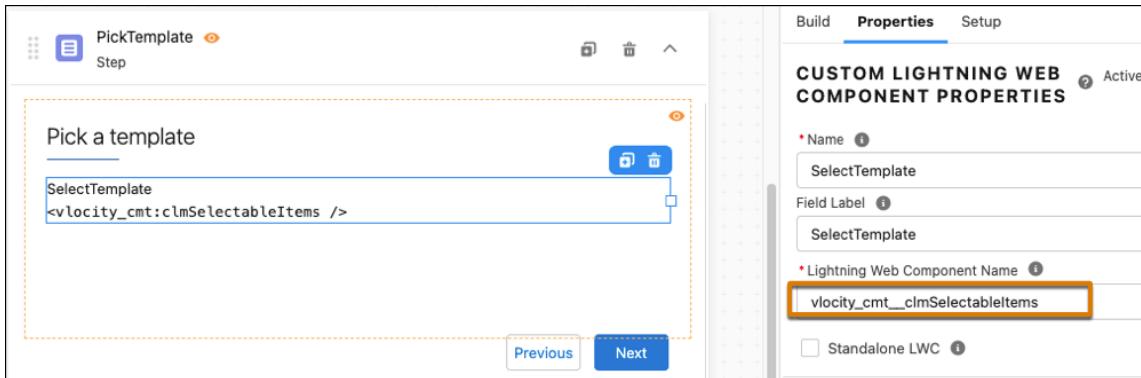

7. Click the **GetDocumentTemplates** DataRaptor Extract Action element. In the right panel under Properties, click the  icon to open the DataRaptor Extract.

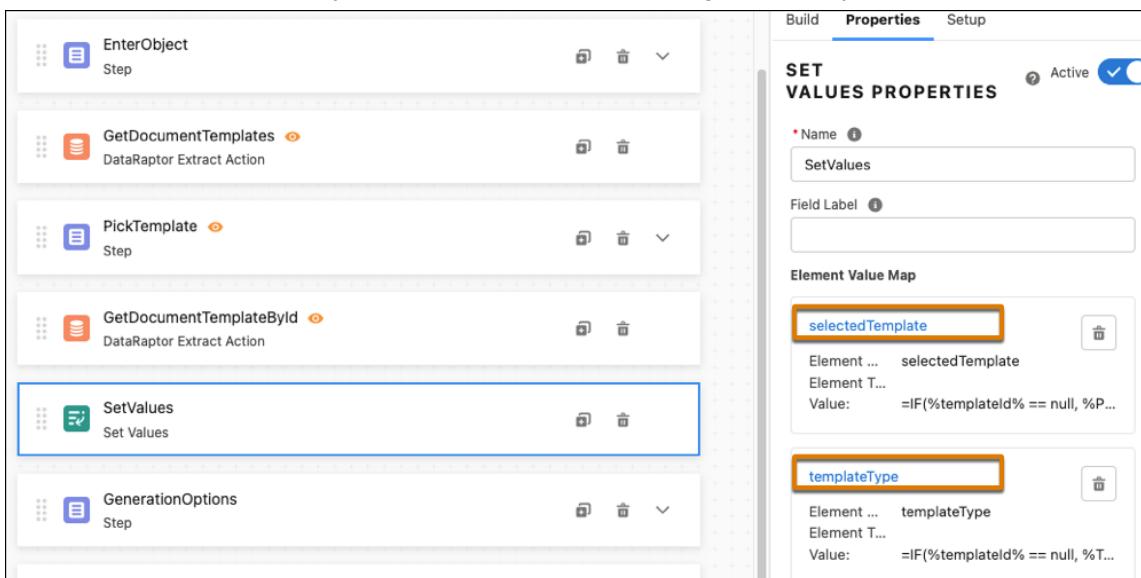

8. In the **EXTRACT** tab of the DataRaptor, notice the filter options.
9. In the **OUTPUT** tab, notice the Extract and Output JSON paths.
10. Click the back button to navigate to the omniscrypt.

11. Back in the OmniScript, click the **PickTemplate** step element. Click the **SelectTemplate** element inside the step. Notice the custom Lightning Web Component. It displays the template types in a list so we can select one.

12. Click the **SetValues** element. Notice the **selectedTemplate** and **templateType** values. These values are passed to the **GenerationOptions** step.

Explore Client-Side Document Generation

Exercise Guide

13. Click the **GenerationOptions** step element. Examine the fields.

The screenshot shows the 'GenerationOptions' step configuration screen. It includes fields for:

- Download File Format: A dropdown menu showing 'All'.
- Attach File Format: A dropdown menu showing 'Microsoft Word'.
- Document Viewer: A dropdown menu showing 'VlocityClientSideViewer'.
- Doc Generation Mechanism: A dropdown menu showing 'VlocityClientSide'.
- Pdf Generation Source: A dropdown menu showing 'VlocityClientSide'.
- Use Template DRExtract?: A dropdown menu showing 'Yes'.
- Document Generation Font Source: A dropdown menu showing 'Rich Text Editor Font'.
- Document Title: A text input field containing 'TestDocument'.

14. Click the **Set Generation Option** Set Values element. Notice the values in the Properties panel on the right. The element sets these values and passes them to the **Generate Document** step.

15. Click the **Generate Document** step element. Notice the custom Lightning Web Component and Email Action elements.

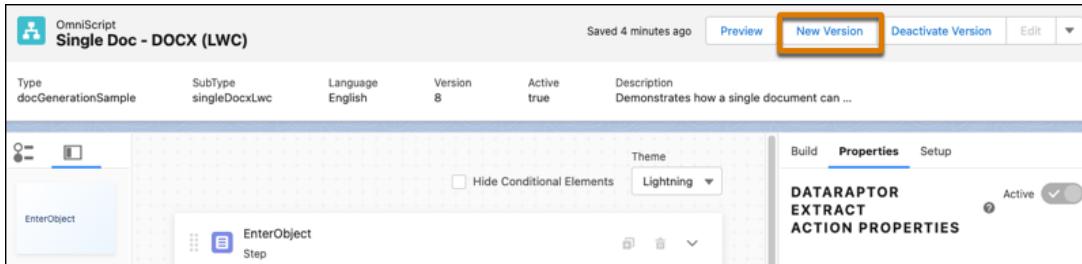

The screenshot shows the 'Generate Document' step configuration screen. It includes:

- A code editor area containing the following code:

```
GenerateDocumentWord
<vlocity_cmt:c1m0sDocxGenerateDocument />
```
- Two buttons at the bottom: 'Email Word/Powerpoint' and 'Email PDF'.

Task 2: Version and Edit the Sample Client-Side OmniScript

1. Click **New Version** to create a new version of the OmniScript. It is recommended that you create a new version before making any changes to the sample OmniScript.

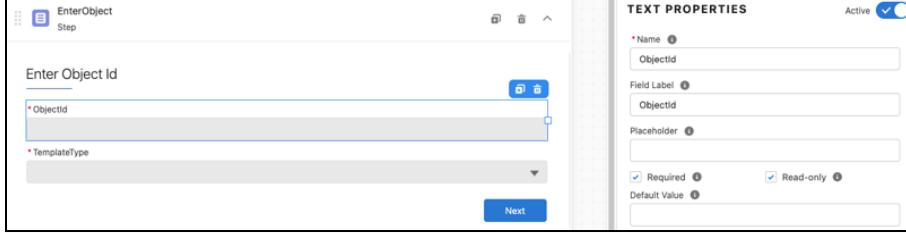

2. Click **Edit**.
3. Enter the following information:

Field	Value
Name	Quote Document Generation OmniScript
Language	English
Type	docGen
Subtype	QuoteDocument
Description	OmniScript for generating a single quote document

Edit OmniScript

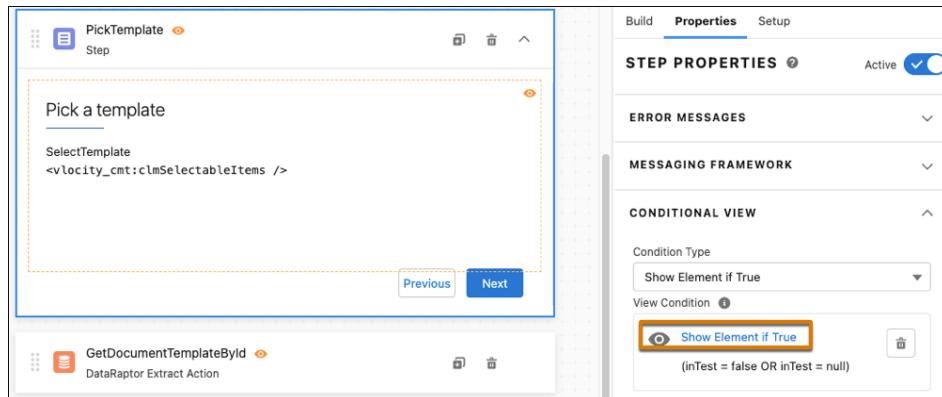

* Name	* Language
Quote Document Generation OmniScript	English
* Type	* SubType
docGen	QuoteDocument
Description	
OmniScript for generating a single quote document	
<input type="button" value="Cancel"/> <input type="button" value="Save"/>	

4. Click **Save**.
5. Edit **EnterObject** step fields to read only.
 - a. Click the **EnterObject** step to expand it.
 - b. Click the **ObjectId** field.
 - c. In the Properties panel on the right, select **Read-only**.
 - d. Click the **Template Type** field.
 - e. In the Properties panel on the right, select **Read-only**.
 - f. Click **Microsoft Word .DOCX Template** and select the **Use as Default Value** checkbox.

Edit Option

* Value <small>i</small> <input type="text" value="Microsoft Word .DOCX Template"/>	* Label <small>i</small> <input type="text" value="Microsoft Word .DOCX Template"/>
<input checked="" type="checkbox"/> Use as Default Value <input type="checkbox"/> Auto Advance <small>i</small>	
<input type="button" value="Cancel"/> <input type="button" value="Save"/> <input type="button" value="Save & New"/>	

- g. Click **Save**.
6. Edit the OmniScript to pre-select the template.
 - a. Add a conditional view to hide the PickTemplate step if templateId is provided.
 - i. Click the **PickTemplate** step.
 - ii. In the Properties panel on the right, expand **CONDITIONAL VIEW**.
 - iii. Click **Show Element if True**.

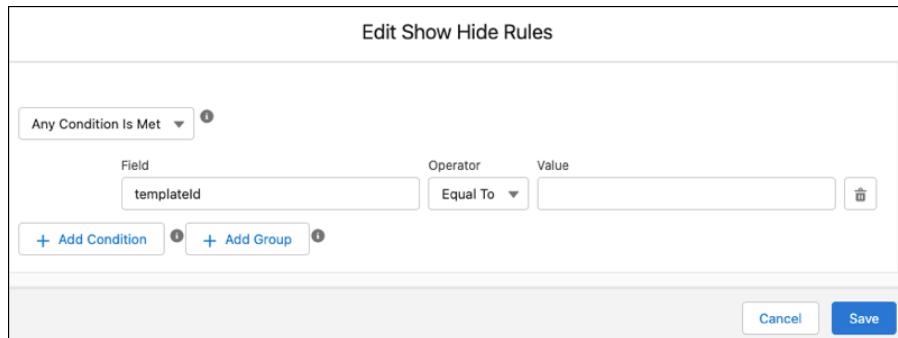

The screenshot shows the OmniScript builder interface. On the left, there's a list of steps: 'PickTemplate' (selected), 'GetDocumentTemplateById', and 'DataRaptor Extract Action'. The 'Properties' tab is active in the top navigation bar. On the right, the 'STEP PROPERTIES' panel shows the 'Active' checkbox is checked. The 'CONDITIONAL VIEW' section is expanded, showing a dropdown for 'Condition Type' set to 'Show Element if True' and a condition field containing '(inTest = false OR inTest = null)'. Other sections like 'ERROR MESSAGES' and 'MESSAGING FRAMEWORK' are also visible.

- iv. Edit the following fields:

Field	Value
Field	templateId
Operator	Equal To

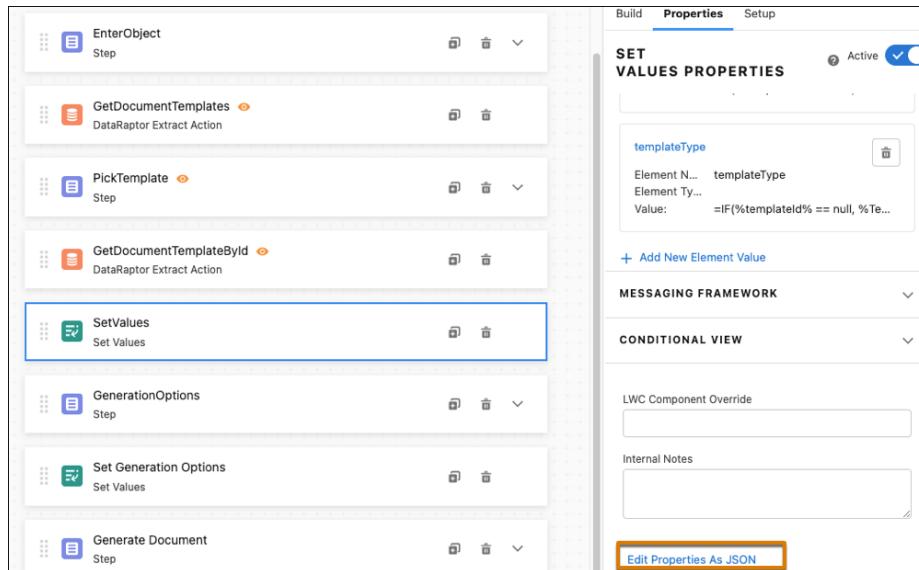

Value	[leave blank]
-------	---------------

- v. Delete the second condition.

- vi. Click **Save**.

- b. Edit SetValues element to add the pre-selected template.
- Click the **SetValues** element. Make sure to click the element with the name **SetValues**, not the **Set Generation Options** element.
 - Click **Edit Properties As JSON** on the bottom of the Properties panel.

- iii. Replace the **elementValueMap** node with the value below.

```
"elementValueMap": {  
    "preSelectedTemplate": {  
        "Id": "=%templateId%",  
        "TemplateType": "=%TemplateType%"  
    },  
    "selectedTemplate": "=IF(%templateId% == null,  
        %PickTemplate|1:SelectTemplate|1%,  
        %preSelectedTemplate%)",  
    "templateType": "=%TemplateType%"  
},
```

- iv. Click Close JSON Editor.

- c. Edit Set Generation Options element.

- i. Click the Set Generation Options element.

- ii. In the Properties panel on the right, click **+Add New Element Value**.
- iii. Edit the following fields:

Field	Value
Element Name	selectedTemplate
Expression	=IF(%templateId%!=NULL, ,
	%preSelectedTemplate%, %selectedTemplate%)

Add New Element Value

Element Name <small>(i)</small>	selectedTemplate
Expression	
IF(%templateId%!=NULL, %preSelectedTemplate%, %selectedTemplate%)	
<input checked="" type="checkbox"/> Use Expression For Value	
<button style="border: 1px solid #ccc; padding: 2px 10px; margin-right: 10px;">Cancel</button> <button style="background-color: #0070C0; color: white; border: 1px solid #0070C0; padding: 2px 10px;">Save</button> <button style="background-color: #0070C0; color: white; border: 1px solid #0070C0; padding: 2px 10px;">Save & New</button>	

- iv. Click **Save**.

7. Edit **Generation Options** step.

- a. Click the **GenerationOptions** step
- b. Click the **Document Title** field and move it right above the **Download File Format** field.
- c. In the Properties panel, change the Default Value of the **Document Title** field to **Quote Document**.

Explore Client-Side Document Generation

Exercise Guide

A screenshot of the Salesforce Visualforce builder interface. On the left, the 'Generation Options' step is displayed with various configuration fields: Document Title ('Quote Document'), Download File Format ('All'), Attach File Format ('Microsoft Word'), Document Viewer ('VlocityClientSideViewer'), Doc Generation Mechanism ('VlocityClientSide'), and Pdf Generation Source ('VlocityClientSide'). On the right, the 'Properties' panel is open for the 'Document Title' field, showing its properties: Name ('DocumentTitle'), Field Label ('Document Title'), Placeholder (''), Required (unchecked), Read-only (checked), Default Value ('Quote Document'), Mask (''), and Minimum Length (0). The 'Active' switch is also checked.

- d. Click the **Use Template DRExtract?** field and in the Properties panel, check **Read-only**.

A screenshot of the Salesforce Visualforce builder interface. The 'Generation Options' step is shown with the 'Use Template DRExtract?' field highlighted. On the right, the 'Properties' panel is open for this field, specifically the 'SELECT PROPERTIES' section. It shows the field name ('UseTemplateDRExtract'), field label ('Use Template DRExtract'), and a checked 'Read-only' checkbox under the 'Required' section. Other properties like Option Source ('Manual') and Options ('Yes') are also visible.

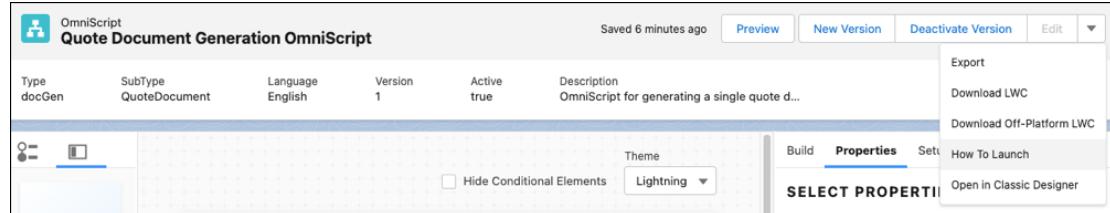

8. Click **Activate Version** to activate the OmniScript and then click **Done**.

A screenshot of the Salesforce OmniScript list view. A single record is selected: 'Quote Document Generation OmniScript'. The details shown are: Type ('docGen'), SubType ('QuoteDocument'), Language ('English'), Version ('1'), Active ('false'), and Description ('OmniScript for generating a single quote d...'). At the top right, there are buttons for 'Preview', 'New Version', 'Activate Version', and 'Edit'. Below the table, it says 'Saved a minute ago'.

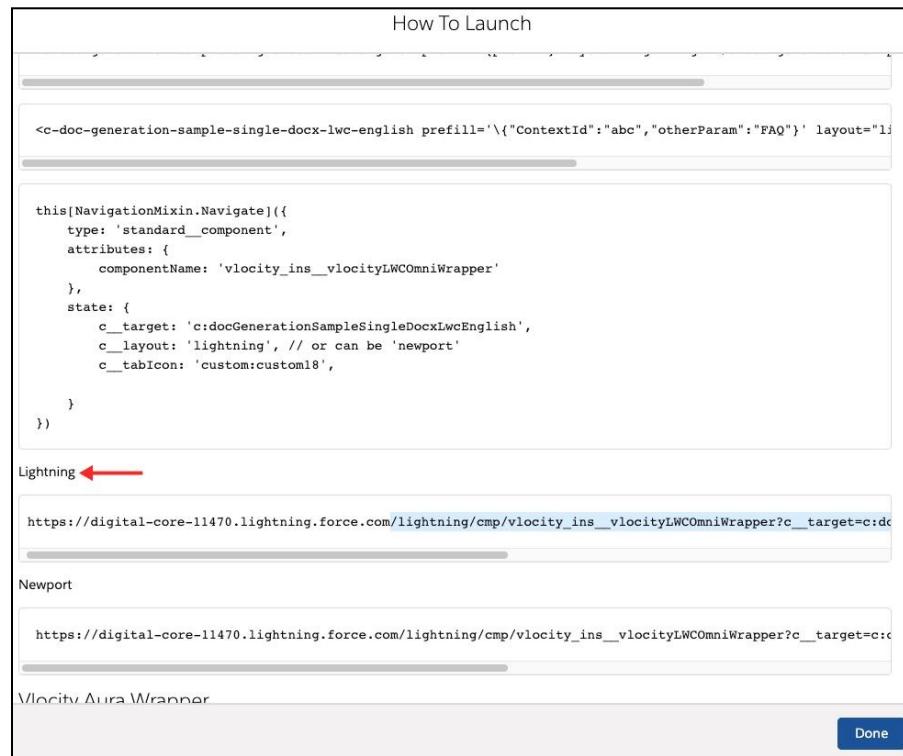

Task 3: Edit the Generate Document Button on the Quote Record Page to Launch the OmniScript

1. Retrieve Lightning Launch URL.

- a. From the Header section, click the dropdown and select **How To Launch**.

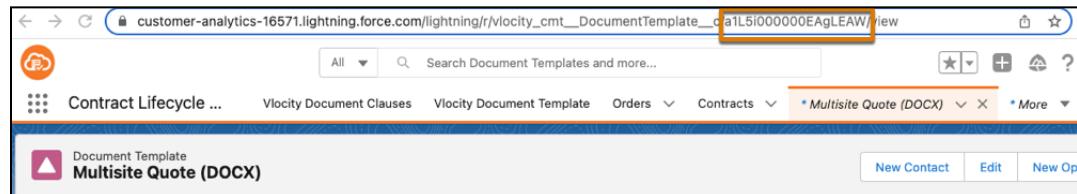

- b. In the **Lightning** URL box, copy the URL starting from /lightning.

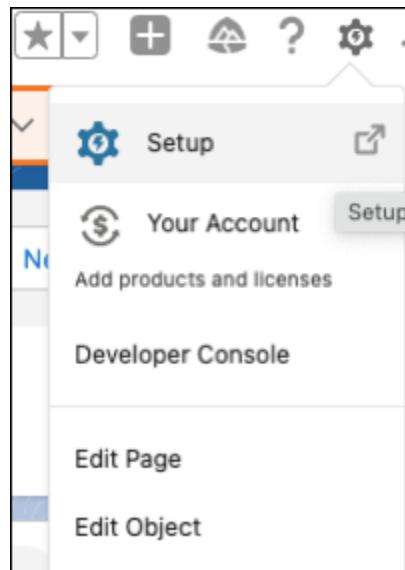

- c. Click **Done** to close the How To Launch dialog.
2. Retrieve the TemplateId.

- a. Using the **Lightning App Launcher**  , type templates in the search box. Click **Document Templates**.
- b. From the list view, select **All Templates**.
- c. Click **Multisite Quote (DOCX)** to open the template information.
- d. Copy the alpha-numeric combination from the URL between **DocumentTemplate__c/** and **/view**. This is the Template Id. Save it for later.

3. Edit Generate Document button.

- a. Click **Setup**.

- b. Click **Object Manager** and open the **Quote** object.
 - c. Click **Buttons, Links, and Actions**.

Explore Client-Side Document Generation

Exercise Guide

- d. Click **Generate Document**. We pre-built this custom button for training purposes.

LABEL	NAME	DESCRIPTION
Generate Document	Generate__Document	
Generate Document PDF	GenerateDocumentPDF	
Generate PDF	TelcoPDF	
Generate Proposal	GenerateProposal	
Generate Proposal LWC	GenerateProposalLWC	Calls OmniScript to generate the proposal document

- e. Click **Edit**.
- f. Delete whatever text may be here and paste the **Lightning Launch URL** from an earlier step into the formula field.

Custom Button or Link Edit

Label: Generate Document

Name: Generate__Document

Description:

Display Type: Detail Page Button

Behavior: Display in new window

Content Source: URL

Select Field Type: Quote

Insert Field: /lightning/cmp/vvelocity_cmt_vvelocity!NCOmniWrapper?c_target=c:docGenQuoteDocumentEnglish&c_layout=newport&c_tableIcon=custom:custom18

Functions: ABS, ACOS, ADDMONTHS, AGE, AGEON, AND

g. Append

- &c__ObjectId={!Quote.Id}&c__TemplateType=MicrosoftWord at the end of the URL. This passes QuoteId from the record into the OmniScript and pre-selects the template type.
- h. Append &c__templateId=.
- i. Append template Id you saved in an earlier step at the end of the URL. This passes template Id to the OmniScript and pre-selects the template the OmniScript is going to use.
- j. Make sure there are no spaces in the URL.

k. Click Save.

4. Test the Document Generation process.

- a. In the Lightning Navigation Bar, click **Quotes** tab.
- b. From the list view dropdown, select **All Quotes**.
- c. Click **Quote Generation** to open the quote page.

Explore Client-Side Document Generation

Exercise Guide

- d. Click the drop down in the header and click **Generate Document**.

The screenshot shows the Salesforce Quote Generation page. At the top right, there is a dropdown menu with options like 'New Lead', 'Edit', 'Delete', etc. The 'Generate Document' option is highlighted. The main page displays quote details: Quote Number 00000004, Expiration Date, Syncing status, Opportunity Name 'Quote Generation', Account Name 'White, Carole', and Grand Total \$0.00. Below this is a status bar with steps: Draft, Needs Review, In Review, Approved, Rejected, Presented, Accepted, Denied. A search bar says 'What can I help you with?'. At the bottom, there are tabs for 'Related' (Contracts 0) and 'Activity' (New Event, New Task).

- e. The OmniScript opens. Go through the OmniScript Steps to generate the quote document.

The screenshot shows the 'Generate Document' OmniScript interface. It displays a Microsoft Word document titled 'Quote Document.docx'. The document contains the INFIWAVE logo, the text 'QUOTE FOR White, Carole', 'Toronto, Ontario Canada', 'PRODUCT SUMMARY', and 'Home Internet Solution'. There are download buttons for 'Download Word' and 'Download PDF' at the top right of the document view.

- f. Close the Generate Document tab and go back to the **Quote Generation** Quote page.
g. Go to the **Notes & Attachments** related list and notice the quote document attached.
